

World Travel, Inc. Expands Strategic Partnership with Sabre to Drive Innovation and Enhance Global Travel Programs

10/07/2025

SOUTHLAKE, Texas and EXTON, Pa., Oct. 7, 2025 /PRNewswire/ -- [World Travel, Inc. \(WTI\)](#), a top-10 U.S. travel management company and a preferred partner for global mid-market corporate clients, today announced its expanded strategic partnership with [Sabre Corporation](#), a leading software and technology provider for the global travel industry. This new multi-year agreement to utilize SabreMosaic™ Travel Marketplace strengthens WTI's commitment to leveraging the industry's most advanced tools and technologies to meet evolving travelers expectations and optimize client-managed travel programs.

The decision to expand the partnership with Sabre reflects a strategic alignment of capabilities that are transforming WTI's service delivery. Through SabreMosaic Travel Marketplace, World Travel, Inc. gains a consolidated view of traditional, NDC, and low-cost carrier (LCC) content—streamlining access and eliminating fragmentation. This integration empowers advisors with instant visibility into the full spectrum of travel options, ensuring travelers receive the most relevant and efficient choices. These benefits became especially clear after WTI migrated the majority of their business to Sabre in 2024, experiencing strong operational gains from SabreMosaic and its suite of efficiency-focused tools. Building on that success, they've now moved the remainder of their business to Sabre.

World Travel, Inc. has achieved year-over-year business growth exceeding 10% by remaining steadfast in its commitment to delivering unparalleled service, high-performing business travel initiatives, and continuous innovation through the power of its people. This approach is designed to ensure that customers consistently meet their corporate objectives.

"As the travel industry continues to evolve, our commitment to staying at the forefront of technology and content is unwavering," said Liz Mandarino, CEO of World Travel, Inc. "Sabre's platform, including the SabreMosaic Travel Marketplace, provides the robust, next-generation infrastructure we need to offer our clients the most comprehensive content and a superior, more personalized experience for their travelers."

Furthermore, Sabre's open API infrastructure adds the flexibility to create tailored integrations and solutions that match the specific needs of each corporate client. Together, these capabilities deliver a richer, more personalized, and more efficient experience that helps companies optimize their travel programs while ensuring travelers receive consistent, high-quality service at every stage of their journey.

"SabreMosaic Travel Marketplace equips WTI with broader access to air, lodging, rail and car content within one environment," said Todd Arthur, Senior Vice President, North America Agency, Americas Delivery and Global Corporate Solutions at Sabre. "It introduces automation that reduces manual tasks, accelerates servicing and supports agents with AI-driven recommendations. For WTI this means higher productivity, lower operating costs and the ability to deliver a more consistent experience to its corporate clients worldwide."

The multi-year agreement reinforces a long-standing partnership between WTI and Sabre, extending collaboration across distribution, automation and retailing capabilities. It sets the framework for continued joint innovation, ensuring WTI's corporate clients benefit from more efficient travel programs while Sabre advances its position as a strategic technology partner to leading agencies.
